

Introduction

Northridge Systems is a technology services firm focused on delivering robust, innovative and mission-critical solutions on the Microsoft platform. Founded in 1999, Northridge Systems is a Microsoft Gold Certified Partner and one of the leading systems and software consulting firms in the southeast. Headquartered in Roswell, GA, Northridge Systems provides services to clients throughout the Atlanta metropolitan area as well as the Greater Southeast. Northridge Systems offers a suite of services within three core practice lines which are Custom Development, IT Infrastructure and Business Intelligence.

Areas of Expertise

❖ Custom Development

The Northridge Systems Custom Development group provides custom software and website development services based on the latest Microsoft technologies including the .NET Framework 3.0 and SQL Server 2005. Our team provides full lifecycle software engineering expertise covering all critical roles including project management, interface design, database modeling, software architecture, database administration, software programming and quality assurance testing.

❖ IT Infrastructure

The Northridge Systems IT Infrastructure group provides high-quality technology infrastructure services to businesses of all sizes. Our Advanced Infrastructure team is comprised of expert-level Microsoft Certified Systems Engineers (MCSE) who deliver project-based implementation services. Our IT Management team provides small to medium-sized businesses with a complete IT outsourcing solution including helpdesk support, remote support, onsite support, monitoring, hosting, and technology planning.

❖ Business Intelligence

The Northridge Systems Business Intelligence group provides data warehousing and BI services that enable decision-makers to drive increased business performance at strategic, tactical and organizational levels. Our team of deeply skilled BI consultants has vast expertise with key Microsoft tools and technologies including SQL Server 2005, Analysis Services, Reporting Services, PerformancePoint Server 2007, ProClarity, and Business Scorecard Manager 2005.
